Professional Summary

Full Stack AI Developer experienced in building production SaaS products, AI-powered applications, and scalable backend systems. Built products serving 100+ registered users with 10+ paying customers, specializing in RAG pipelines, real-time systems, AI agents, event-driven architectures, and modern web applications.

Experience

Full Stack Developer — One1App (Remote)

October 2025 - May 2026

- Architected a centralized subscription platform across four SaaS products with shared billing, feature entitlements, and RBAC.
- Designed backend workflows for subscription lifecycle management including upgrades, renewals, and access control.
- Developed production REST APIs, admin dashboards, analytics, and AI-powered workflow automation.
- Improved operational efficiency through internal automation and scalable backend services.

Projects

SeedheDocs.org — Founder & Full Stack AI Developer

May 2026 - Present

- Built an AI-powered academic SaaS serving **100+ registered users** and **10+ paying customers**.
- Engineered a document-grounded RAG pipeline with vector embeddings for assignment and project report generation.
- Developed an AI document editor supporting inline AI editing and generation of 20+ diagram types.
- Built GitHub repository analysis, subscription billing, authentication, PDF export, and production AI workflows.

Relayt.xyz — Full Stack AI Developer

Jun 2026 - Present

- Built an AI-powered omnichannel customer engagement platform with AI agents trained on websites and documents.
- Developed real-time synchronized conversations across dashboard and Telegram with AI-to-human handoff.
- Engineered event-driven workflows using Inngest for background jobs, campaign scheduling, notifications, and automation.
- Adopted in production by LeadInbox.io, SeedheDocs.org, and LexSpeaks.com.

Technical Skills

Languages: JavaScript, TypeScript, SQL, C++

Frontend: React.js, Next.js, HTML5, CSS3, React Native, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, WebSockets, Event-Driven Architecture

Databases: MongoDB, PostgreSQL, Prisma ORM

AI & GenAI: LLMs, AI Agents, RAG, Function Calling, Prompt Engineering, Vector Embeddings, Semantic Search, AI Workflow Orchestration, OpenAI, Gemini, Cerebras, OpenRouter

Cloud & Tools: Git, GitHub, Vercel, Cloudinary, Clerk, Razorpay, Inngest

Education

Manipal University Jaipur

Bachelor of Computer Applications (BCA)

2022–2025

CGPA: **9.0/10**

Achievements

- Built and launched multiple production SaaS products with real users.
- Acquired 100+ registered users and 10+ paying customers for SeedheDocs.org.
- Secured Runner-up in the Murf AI Coding Challenge 3 by building **Kalp AI**, an AI-powered Discord bot with conversational AI, coding interview practice, and interactive learning features.
- Built Relayt.xyz, adopted by LeadInbox.io, SeedheDocs.org, and LexSpeaks.com and also powering itself **ralayt.xyz**
